MATERIALS

FRAME

TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.

TEAK

SEAT

BATYLINE®

A woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying action, little sensitivity to staining, and simplicity in cleaning.
